- Motivated Full Stack Developer with hands-on experience in both front-end and back-end technologies, including JavaScript, Node.js, and React.
- Demonstrated strong attention to detail, problem-solving abilities, and effective communication through building full-stack applications.
- Successfully completed studies with honors, delivering quality results through both collaborative and independent projects.

Skills

Frontend
- HTML/CSS
- JavaScript
- React
- Bootstrap
- Responsive Design

Backend
- Node.js
- MongoDB
- MySQL
- REST APIs
- Git

CMS
- WordPress

Education

HackerU – ThriveDX Group   2023 - 2024

Full Stack Web Development Program (535 Academic Hours)
Completed a comprehensive Full Stack Web Development course, covering front-end technologies such as HTML, CSS, JavaScript, React, and back-end technologies such as Node.js and MongoDB. Demonstrated strong problem-solving abilities, critical thinking, and adaptability through real-world projects.

Projects

Portfolio - https://marinapanchenko12345.github.io/Portfolio/
- Carried out as part of academic studies at HackerU Developed a responsive portfolio website showcasing web development skills with HTML, CSS, and JavaScript, demonstrating Full-Stack expertise and enhanced user interface design. Implemented a contact form that sends messages directly to my email, improving user engagement and communication.

business-cards - https://github.com/MarinaPanchenko12345/business-cards
- Carried out as part of academic studies at HackerU Developed a full-featured business card management system, including content creation, login system, and REST API integration, showcasing Full-Stack development skills in React and Redux.

memory-game - https://github.com/MarinaPanchenko12345/memory-game
- Developed a two-player memory game using HTML, CSS, and JavaScript with a Node.js and Express backend to enhance Full-Stack development skills through client-server interaction and game logic implementation.

Final Project - currently in the process of development
- Carried out as part of academic studies at HackerU. Developed a full-stack system for managing products and users, including authentication, with both front-end (React) and back-end (Node.js, Express, MongoDB) components, showcasing Full-Stack development skills in building secure, scalable web applications.
